AI and Analytics Using Zia in Zoho Creator

Aim

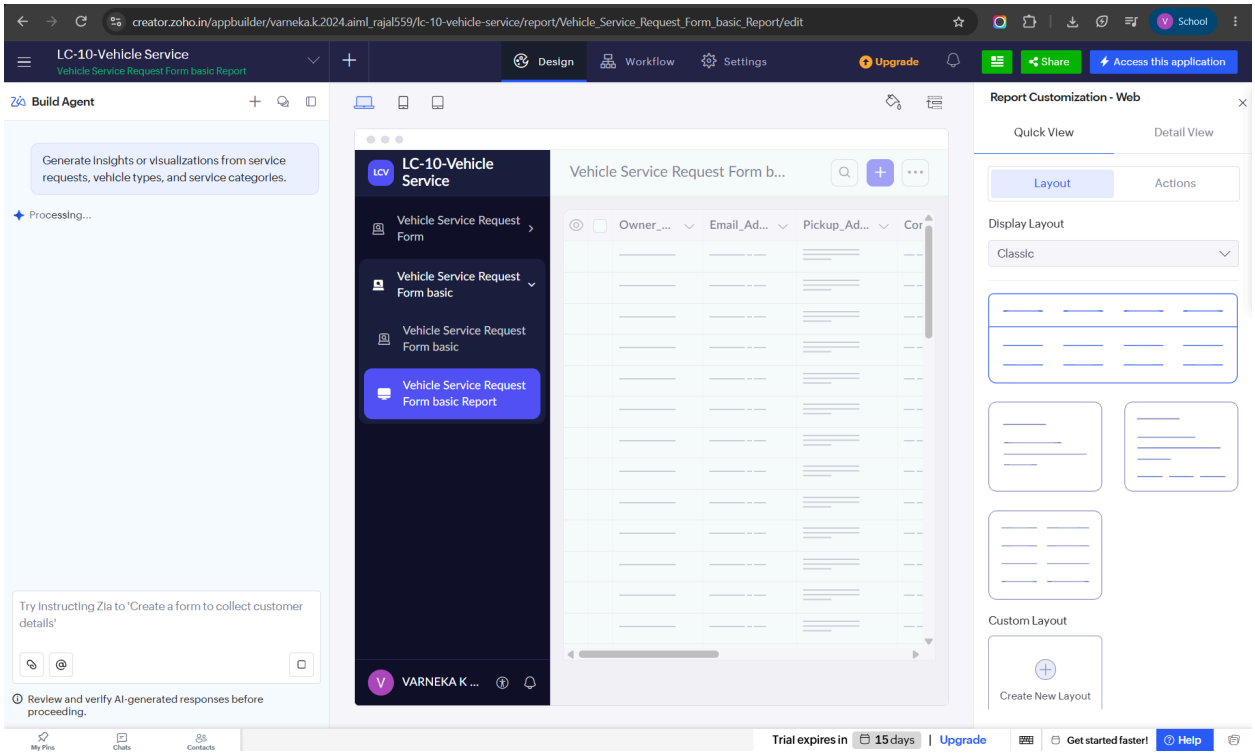

To use Zia in Zoho Creator for data analysis, identifying trends, and generating insights from vehicle service records.

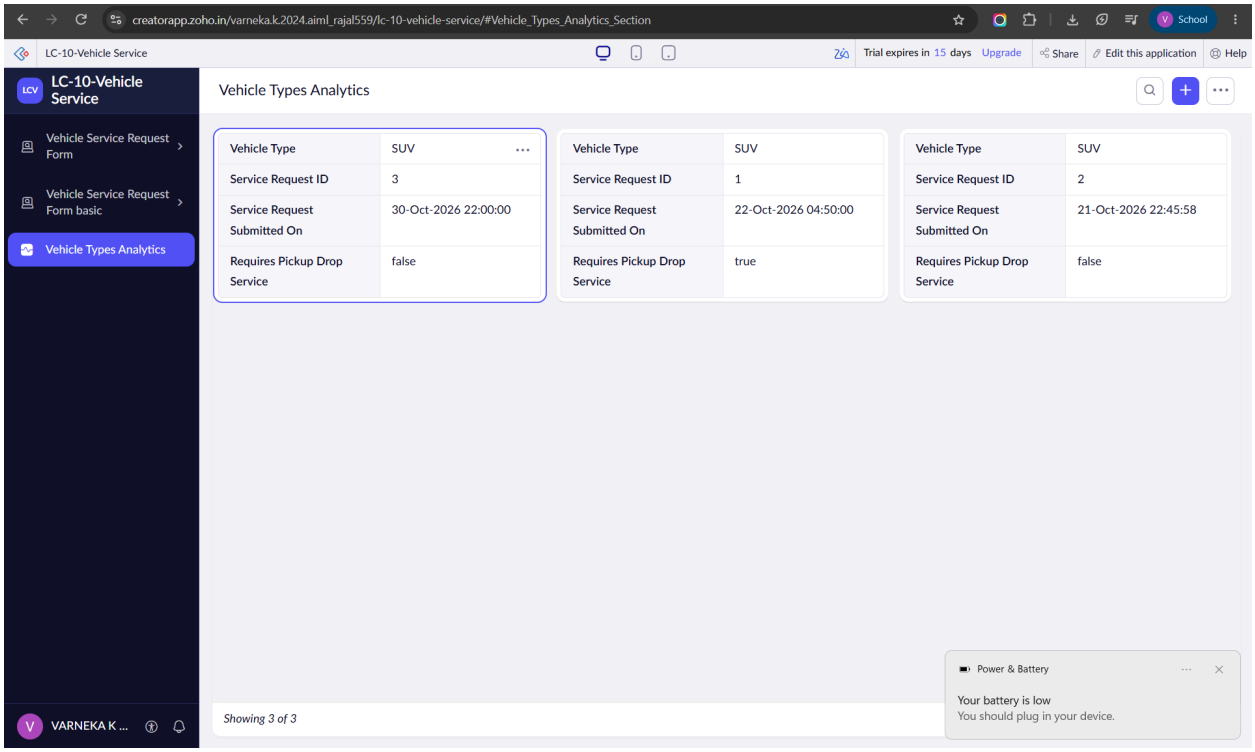

Procedure

1. Open the Zoho Creator application and access the available Zia features.
2. Select the relevant vehicle service data for analysis.
3. Use Zia's available AI capabilities to analyze data and identify patterns.
4. Generate insights or visualizations from service requests, vehicle types, and service categories.
5. Review the results to support service planning and decision-making.

Result

Zia's available AI and analytics capabilities were explored to analyze vehicle service data, identify trends, and support informed decision-making.
