User Management and Role-Based Access Control in Zoho Creator

Aim

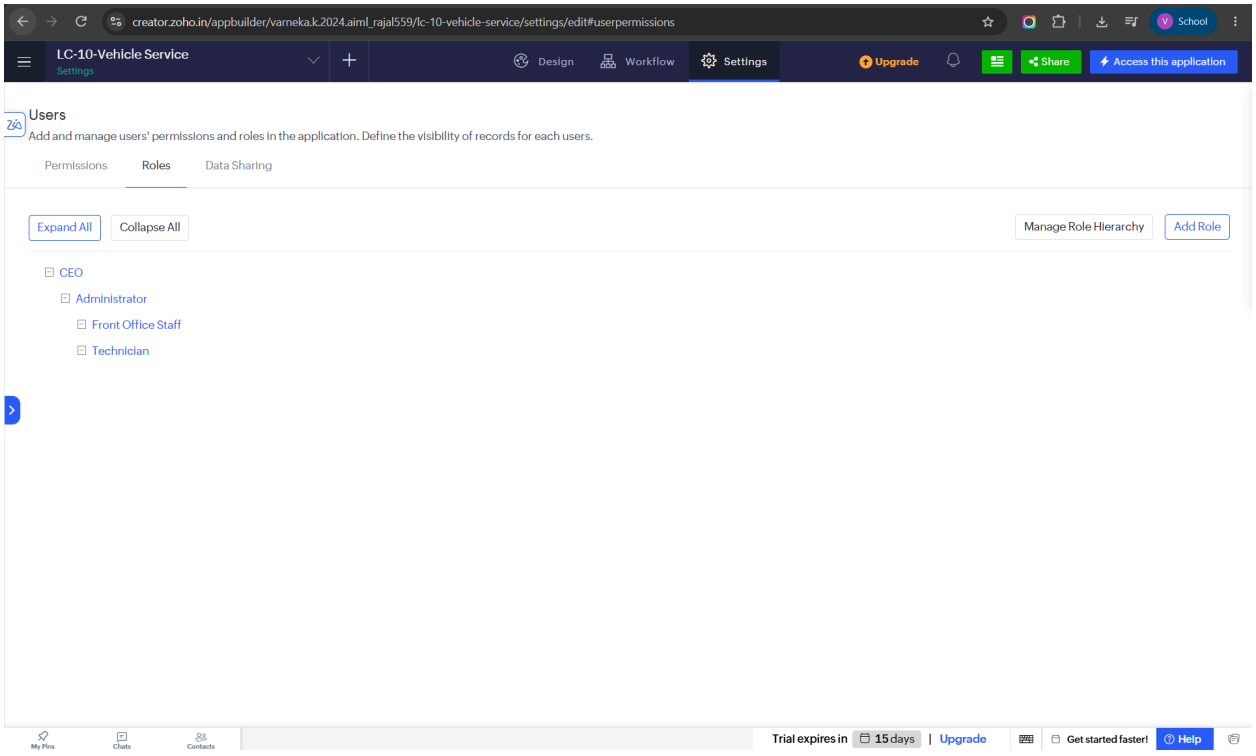

To manage users and assign role-based permissions in Zoho Creator to ensure secure access to application data and features.

Procedure

1. Open the Zoho Creator application and navigate to Users and Permissions.
2. Add users and assign suitable roles, such as Administrator, Front Office Staff, and Technician.
3. Configure permissions for accessing forms, reports, and application data.
4. Restrict access to sensitive information based on assigned roles.
5. Test the permissions by logging in as different users and verifying their access.

Result

User management and role-based access control were configured to protect application data and ensure that users could access only the features permitted by their assigned roles.
