Reports, Dashboards, and UI Builder using Zoho Creator

Aim

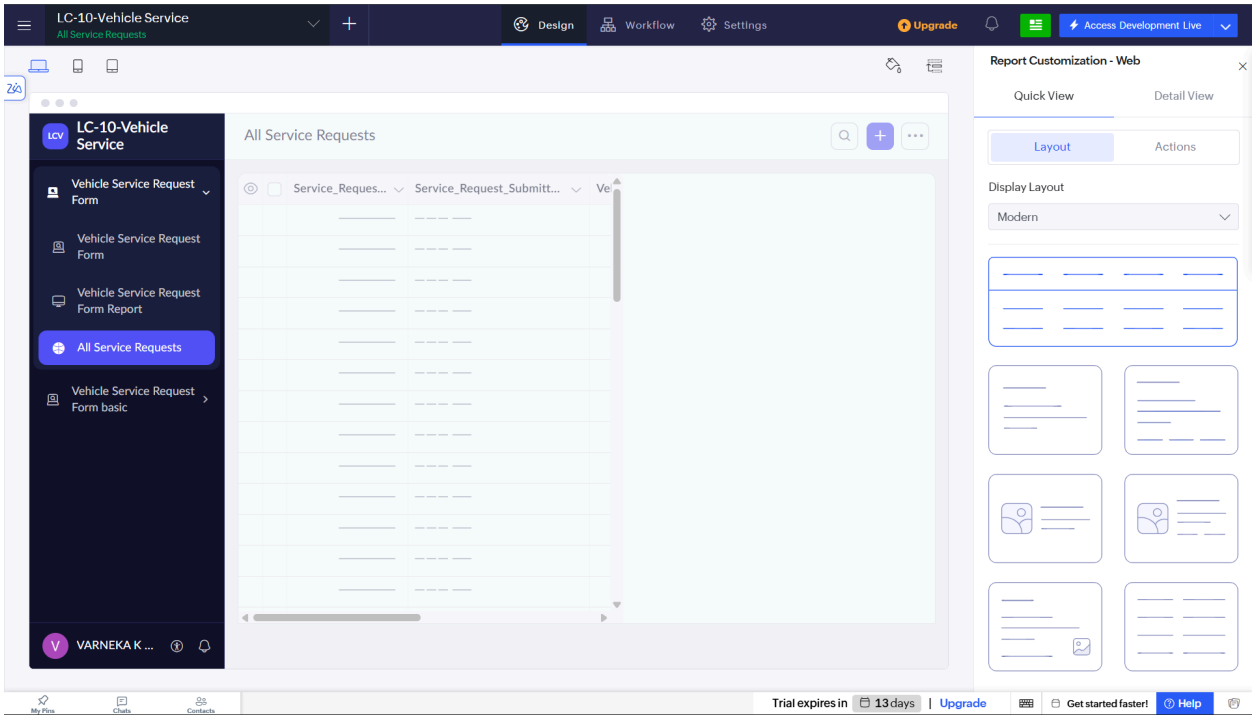

To create and configure nine types of reports in Zoho Creator using the existing `Service_Request_Form` to monitor service requests, track repair progress, and analyze service center operations.

LC-10-Vehicle_Service-Report_Types.pdf

Procedure

1. Open the Vehicle Service & Repair Request Management application in Zoho Creator and select `Service_Request_Form` as the data source.
2. Create and configure the following nine reports:
    - List View: `All_Service_Requests_List` – displays service requests with sorting and search options.
    - Spreadsheet View: `Service_Requests_Spreadsheet` – allows the front office to update diagnosis, repair, and pickup-readiness status.
    - Kanban View: `Service_Status_Kanban` – tracks requests across repair stages.
    - Calendar View: `Service_Schedule_Calendar` – displays scheduled vehicles based on the preferred service date.
    - Map View: `Owner_Location_Map` – shows pickup locations using owner addresses.
    - Timeline View: `Service_Activity_Timeline` – tracks service request trends over time.
    - Pivot Table: `VehicleType_By_ServiceType_Pivot` – compares service request counts by vehicle and service type.
    - Chart View: `ServiceType_Distribution_Chart` – displays the distribution of requests by service type using a pie chart.
    - Summary View: `VehicleType_Wise_Summary` – groups requests by vehicle type and displays request counts and average odometer readings.
3. Configure the sorting, grouping, editable fields, date settings, and summary values according to the requirements of each report.
4. Test the reports using sample service request records and verify that the data is displayed correctly.
5. Use the Dashboard and UI Builder, if required by the application setup, to organize report access and provide convenient navigation for staff.

SCREENSHOTS

Result

Nine report types were configured in Zoho Creator to display, track, and analyze vehicle service requests from different perspectives, supporting repair monitoring, scheduling, pickup planning, and service center management.
