# EXP 6: Workflow Automation Using Deluge in Zoho Creator

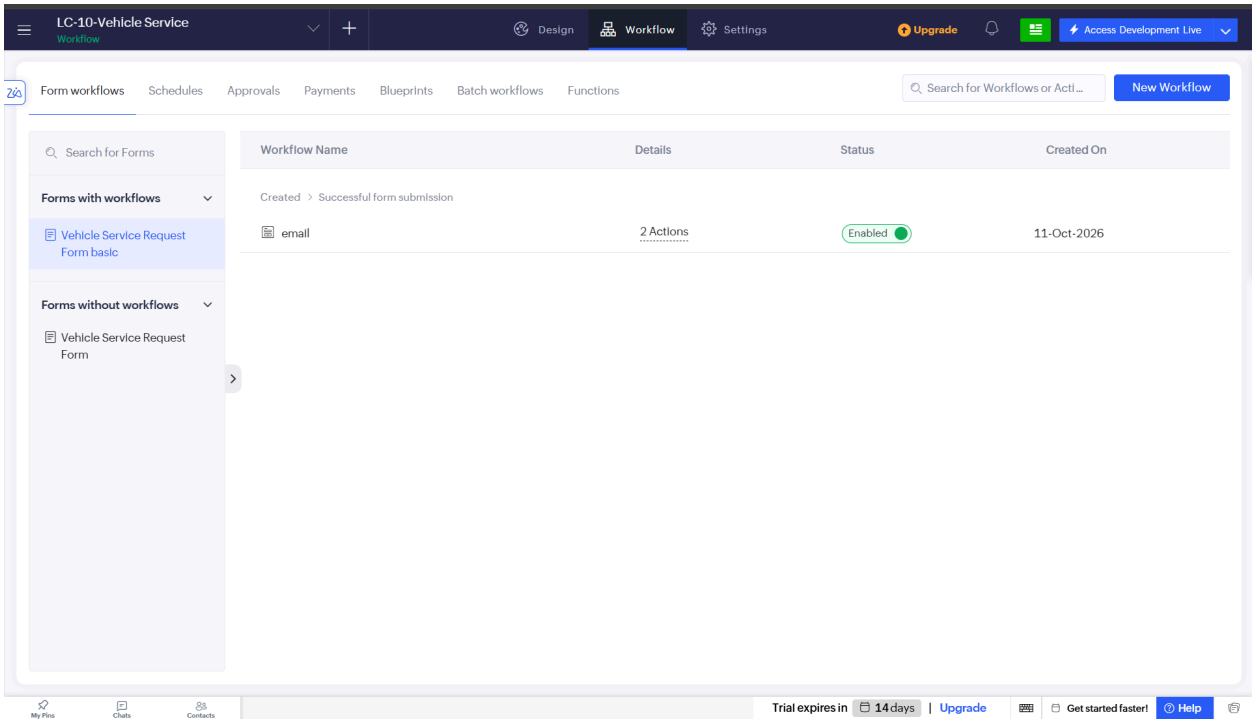

## Aim

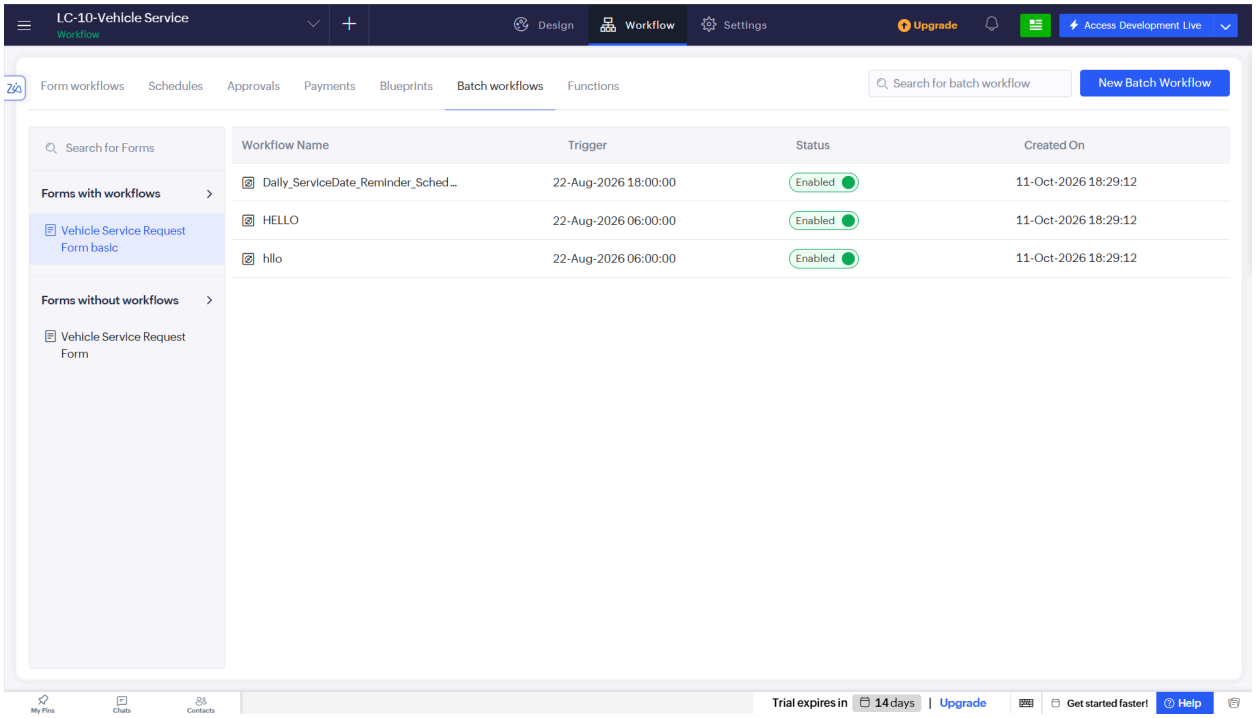

To automate vehicle service operations using Zoho Creator workflows and Deluge.

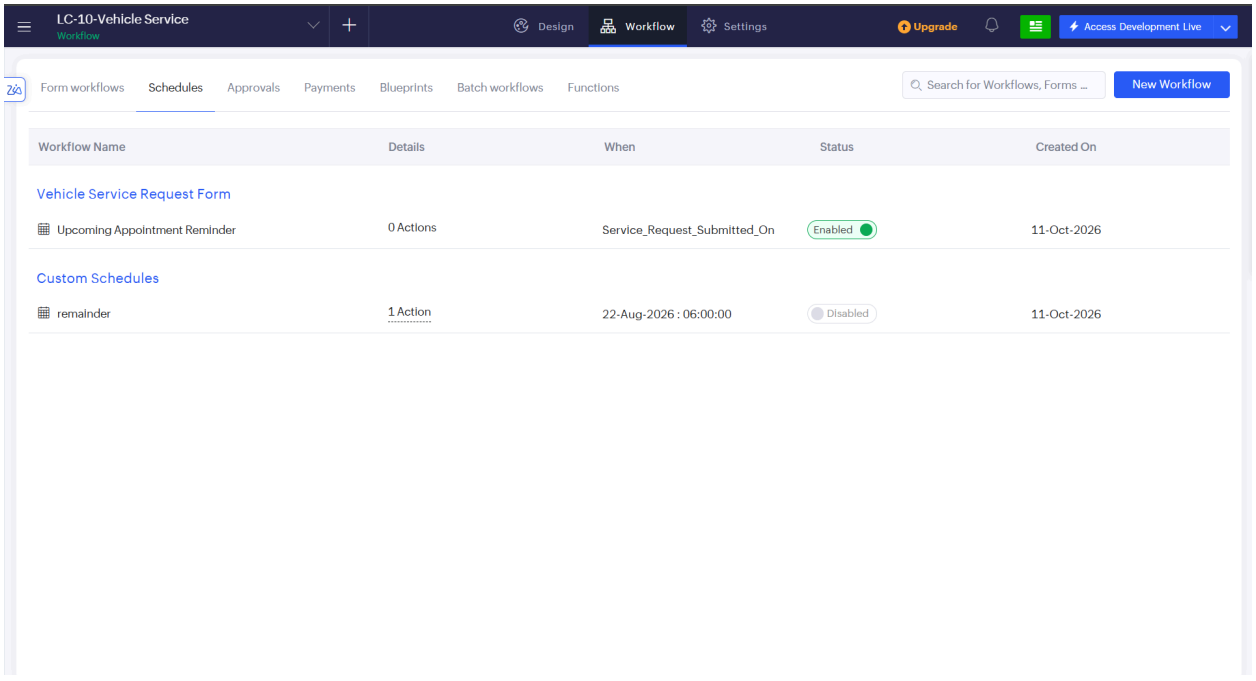

## Procedure

1. Create a form workflow to send service confirmation emails.
2. Schedule automatic reminders for upcoming service appointments.
3. Configure approvals for high-cost repairs and payments before vehicle release.
4. Create a Blueprint to manage service stages from request to delivery.
5. Set up batch workflows for periodic service reminders.
6. Create a report workflow to recalculate costs when estimates or discounts change.
7. Write a reusable Deluge function to generate and email service invoices.
8. Test all workflows using sample records.

## Screenshots:

## Result

Workflow automation was configured to reduce manual work and manage service notifications, approvals, payments, repair progress, and invoice generation.
